

# 10.5KG STACK DRYER/DRYER

## MLE27 AND MLG27

### LARGE CAPACITY

- Two large 10.5kg capacity dryers allows for large loads to be dried effectively
- Stack configuration allows for two dryers in the floor space of just one to get the most out of your laundry

### CONTROLS TO MEET YOUR NEEDS

- Simple one touch cycle selection for easy of operation
- "PD" Coin or Card activated machines come stand with M-Series technology to allows owners to optimize earnings with multiple pricing options

### FRONT-ACCESS PANEL

- Streamlines self-service by providing fast entry to internal component
- Minimizes downtime to help keep the machine running

### BUILT TO LAST

- Four-roller suspension with permanently lubricating bearings
- Heavy-duty steel cabinet
- Blower guard — reduces service calls, helping to keep machines running at optimal turns

### TURBOVENT® SYSTEM

- A high-speed blower wheel optimizes performance in long vents
- High airflow helps reduce drying times for a wide variety of loads
- Helps to increase efficiency and number of cycles over the life of the machine

## Maytag Commercial Install Summary

### MAT20 & MAT23 Top Load Washer

- Standard 10AMP GPO within 1.0m to plug into
- ¾" hot and cold water taps within 1m
- Standpipe or laundry drain minimum 77cm high

#### Before operation:

- Installation manual to be read
- Unit to be levelled

### MHN33 Front Load Washer

- Standard 10AMP GPO within 1.0m to plug into
- ¾" hot and cold water taps within 1m
- Standpipe or laundry drain minimum 77cm high – if supplied on plinth, laundry drain to be 102cm high

#### Before operation:

- Installation manual to be read
- Shipping bolts to be removed
- Power cord to be pulled through
- Unit to be levelled

### MDE20 or MDE28 ELECTRIC Dryer.

- No power cord supplied - requires hardwiring into a dedicated 1 phase 25AMP circuit by your electrician.
- Requires fluing to external air using single skin 100mm rigid galv<sup>2</sup>

\*Natural gas as standard - LPG Conversion Kits available.

#### Before operation:

- Installation manual to be read
- Unit to be levelled

### MDG20 or MDG28 GAS Dryer.

- Standard 10AMP GPO within 1.0m to plug into
- Not Fitted
- Licensed gas plumber required to connect to gas and fluing on site
- Requires fluing to external air using single skin 100mm rigid galv<sup>2</sup>

\*Natural gas as standard - LPG Conversion Kits available.

#### Before operation:

- Installation manual to be read
- Unit to be levelled

### Install summary is a brief guide only and does not cover all requirements.

Full installation manual is supplied with each machine as hard copy and is also available via email on request.

**1** – Clearances are minimum for dryer free air requirements. Additional clearances may be required depending on fluing and supply requirements on site.

**2** - All dryers must be flued to external air with rigid galvanised ducting. Dryers in outdoor areas require fluing to direct heat and lint away from unit. Multiple /group dryer ducting requirements as per installation manual.

Ducting available from Dependable Laundry Solutions.
