

10.5KG LARGE CAPACITY DRYERS - 20AMP

MDE20 AND MDG20

TURBOVENT® SYSTEM

- A high-speed blower wheel optimises performance in long vents
- High airflow helps reduce drying times for a wide variety of loads
- Helps to increase efficiency and increase the life of the machine

CONTROLS TO MEET YOUR NEEDS

- Mechanical controls provide a simple user interface with robust, easy-to-use knobs
- Get flexibility and individual cycle pricing options for optimal earnings through Intelligent Controls with M-Series Technology, while end users can easily choose their preferred wash experience with one-touch cycle selection

LARGE CAPACITY

- 10.5kg capacity dryer helps allow for large loads to be dried efficiently and effectively
- Delivers an optimal drying experience for users and helps maximise productivity

BUILT TO LAST

- Porcelain enamel top — a durable finish that stands up to the demands of high-traffic
- Full wrap console — designed to help protect the internal components
- Front-panel accessibility — provides fast entry to internal components for streamlined self-service
- Extra-large reversible door — provides users unhindered access while loading and unloading

CARD READER COMPATIBLE

- Order your new washer as Card Only to prevent vandalism and increase safety on site.
- Never have to worry about where the gold coins from your laundry end up with real time reporting and payment deposited straight into your nominated bank account.

Maytag Commercial Install Summary

MAT20 & MAT23 Top Load Washer

- Standard 10AMP GPO within 1.0m to plug into
- $\frac{3}{4}$ " hot and cold water taps within 1m
- Standpipe or laundry drain minimum 77cm high

Before operation:

- Installation manual to be read
- Unit to be levelled

MHN33 Front Load Washer

- Standard 10AMP GPO within 1.0m to plug into
- $\frac{3}{4}$ " hot and cold water taps within 1m
- Standpipe or laundry drain minimum 77cm high – if supplied on plinth, laundry drain to be 102cm high

Before operation:

- Installation manual to be read
- Shipping bolts to be removed
- Power cord to be pulled through
- Unit to be levelled

MDE20 or MDE28 ELECTRIC Dryer.

- No power cord supplied - requires hardwiring into a dedicated 1 phase 20AMP (MDE20) or 25AMP (MDE28) circuit by your electrician.
- Requires fluing to external air using single skin 100mm rigid galv²

*Natural gas as standard - LPG Conversion Kits available.

- Installation manual to be read
- Unit to be levelled

MDG20 or MDG28 GAS Dryer.

- Standard 10AMP GPO within 1.0m to plug into
- Not Fitted
- Licensed gas plumber required to connect to gas and fluing on site
- Requires fluing to external air using single skin 100mm rigid galv²

*Natural gas as standard - LPG Conversion Kits available.

Before operation:

- Installation manual to be read
- Unit to be levelled

Install summary is a brief guide only and does not cover all requirements.

Full installation manual is supplied with each machine as hard copy and is also available via email on request.

1 – Clearances are minimum for dryer free air requirements. Additional clearances may be required depending on fluing and supply requirements on site.

2 - All dryers must be flued to external air with rigid galvanised ducting. Dryers in outdoor areas require fluing to direct heat and lint away from unit. Multiple /group dryer ducting requirements as per installation manual.

Ducting available from Dependable Laundry Solutions.

Maytag Commercial Install Summary
